Imagination’s Canvas

To awaken the inner eye is to touch upon
A realm of heightened experience; each
Fleeting moment revealing another thread
In the Creator’s cosmic tapestry. Sudden
Breakthroughs leading to mystical insights.
Imaginative sparks giving rise to all manner
Of Incredible works. The more receptive
The mind is, to subtle energies that quietly
Shape the inner space. The less friction
One will encounter in the refinement of

A vision: that which emerges from the
Mind’s cavernous depths, infused with
Clarity and focus. The more one weaves
Imagination’s gifts into daily pursuits:
Increases the chances of making
Significant inroads. Each hour spent
In the pursuit, gradually carving out
Something that reflects the qualities
Which best define the character of
What one seeks to convey, with grace.
